2. Statement of compliance

The Bank and its subsidiaries located in Turkey maintain their books of account and prepare their statutory financial statements in Turkish Lira (“TL”) in accordance with the accounting practices as promulgated by the Banking Regulation and Supervision Agency (“BRSA”), regulations promulgated by the Capital Market Board of Turkey and also the Turkish Commercial Code; the Bank’s subsidiaries located in outside of Turkey maintain their books of account and prepare their statutory financial statements in US Dollar and in EUR in accordance with the regulations of the countries in which they operate.

The accompanying condensed consolidated interim financial statements are based on the statutory records with adjustments and reclassifications for the purpose of fair presentation in accordance with International Financial Reporting Standard (“IFRS”) IAS 34 – *Interim Financial Reporting*. They do not include all of the information required for full annual financial statements, and should be read in conjunction with the consolidated financial statements of the Group as at and for the year ended 31 December 2008. The accompanying condensed consolidated interim financial statements are authorized for issue by the directors on 20 August 2009.

3. Basis of preparation

The accompanying condensed consolidated interim financial statements are presented in thousands of TL.

The condensed consolidated interim financial statements are prepared on the historical cost basis as adjusted for the effects of inflation that lasted until 31 December 2005, except that the following assets and liabilities are stated at their fair value if reliable measures are available: derivative financial instruments and financial assets at fair value through profit or loss.

4. Significant accounting policies

Except as described in the following paragraph, the accounting policies applied by the Group in these condensed consolidated interim financial statements are the same as those applied by the Group in its consolidated financial statements as at and for the year ended 31 December 2008.

Presentation of financial statements

The Group applies revised IAS 1 – *Presentation of Financial Statements* (2007), which became effective as of 1 January 2009. As a result, the Group presents in the consolidated statement of changes in equity all owner changes in equity, whereas all non-owner changes in equity are presented in the consolidated statement of comprehensive income. This presentation has been applied in these condensed interim financial statements as of and for the six months period ended on 30 June 2009.

Comparative information has been re-presented so that it also is in conformity with the revised standard. Since the change in accounting policy only impacts presentation aspects, there is no impact on earnings per share.

5. Basis of consolidation

Methodology

The accompanying condensed consolidated interim financial statements include the accounts of the Bank and its subsidiaries on the basis set out in section below. The financial statements of the subsidiaries included in the consolidation have been prepared as of the date of the condensed consolidated interim financial statements.

For the purposes of the accompanying condensed consolidated interim financial statements, the subsidiaries are those companies over which the Bank has a controlling power on their operating and financial policies through having more than 50% of the ordinary shares held by the Bank.

The major principles of consolidation are as follows:

- The statements of financial position and comprehensive income are consolidated on a line-by-line basis.
- All intercompany investments, receivables, payables, dividends received and paid and other intercompany transactions reflected in the statements of financial position and comprehensive income are eliminated.
- The results of the subsidiaries are included in or excluded from the consolidation from their effective dates of acquisition or disposal, respectively.
- Non-controlling interests in the equity and net profit of the consolidated subsidiaries are separately classified in the condensed consolidated statements of financial position and comprehensive income.
- The assets and liabilities of foreign operations are translated to TL at exchange rates at the reporting date. The income and expenses of foreign operations are translated to TL at exchange rates at quarterly average exchange rates. Foreign currency differences are recognised directly in equity as currency translation adjustments.

Subsidiaries

The subsidiaries included in the consolidation and their ownership percentages are as follows:

	Place of Incorporation	Principal Activities	Effective Shareholding and Voting Rights (%)	
			30 June 2009	31 December 2008
Anadolu Yatırım	Istanbul / Turkey	Brokerage	82.00	82.00

6. Estimates

The preparation of condensed consolidated interim financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing these condensed consolidated interim financial statements, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements as at and for the year ended 31 December 2008.

7. Financial risk management

The Group's financial risk management objectives and policies are consistent with that disclosed in the consolidated financial statements as at and for the year ended 31 December 2008

The Group's currency risk and interest rate risk sensitivity are presented below:

Currency risk sensitivity

A 10 percent devaluation of the TL against the following currencies as at 30 June 2009 would have increased/(decreased) equity and profit or loss (without tax effects) by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant. The analysis is performed on the same basis for the year ended 30 June 2008. In case of a 10 percent appreciation of the YTL against the following currencies, the effect will be in opposite direction.

	30 June 2009		30 June 2008

^(*) Equity effect also includes profit or loss effect of 10% deviation of the TL against related currencies.

Floating rate non-trading financial assets and financial liabilities held as at 30 June 2009 are also considered in the calculations. This analysis assumes that all other variables, in particular foreign currency rates, remain constant. This analysis is performed on the same basis for the year ended 30 June 2008.

8. Financial assets at fair value through profit or loss

As at 30 June 2009 and 31 December 2008, financial assets at fair value through profit or loss comprised the following:

	30 June 2009		31 December 2008	
	Carrying value	Effective Interest Rate	Carrying value	Effective Interest Rate

Listed shares	112	--	--	--
Total financial assets at fair value through profit or loss	142,154		35,031	

As at 30 June 2009, the carrying value of financial assets at fair value through profit or loss kept in the Central Bank, Istanbul Menkul Kıymetler Borsası Takas ve Saklama Bankası Anonim Şirketi (Takasbank - Istanbul Stock Exchange Clearing and Custody Incorporation) and Capital Markets of Turkey for legal requirements and as a guarantee for stock exchange and money market operations amounts to TL 33,704 (31 December 2008: TL 2,218). The carrying value of financial assets at fair value through profit or loss backing obligations under repurchase transactions amounts to TL 105,882 (31 December 2008: nil).

9. Derivative financial instruments

In the ordinary course of business, the Group enters into various types of transactions that involve derivative financial instruments. A derivative financial instrument is a financial contract between two parties where payments are dependent upon movements in price in one or more underlying financial instruments, reference rates or indices. Derivative financial instruments include forwards and swaps.

The table below shows the favourable (assets) and unfavourable (liabilities) fair values of derivative financial instruments together with the notional amounts analyzed by the term to maturity with their TL equivalents. The notional amount is the amount of a derivative's underlying asset, reference rate or index and is the basis upon which changes in the value of derivatives are measured. The notional amounts indicate the volume of transactions outstanding at period/year-end and are neither indicative of the market risk nor credit risk.

The fair value of derivative financial instruments is calculated by using forward exchange rates at the reporting date. In the absence of reliable forward rate estimations in a volatile market, current market rate is considered to be the best estimate of the present value of the forward exchange rates.
